

Defining ICT strategy towards smallholder farmers

INDICATIC AIP, Panamá

Agustin Guerra, Research Scientist

<https://indicatic.org.pa/en>

INDICATIC AIP

National Research Institution
(Technology Information and
Communication)

Based in Panama

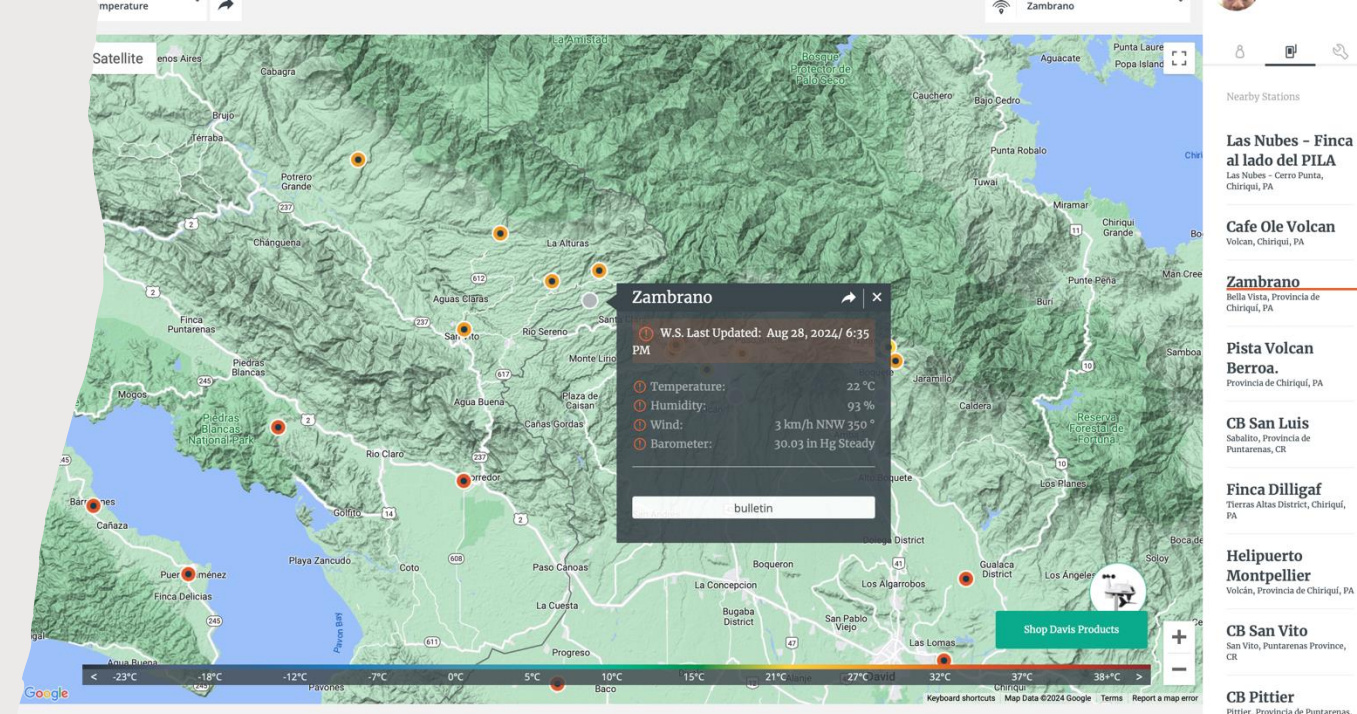

Farming in Panama

- Traditional techniques
- Climate Change
- World renown crops

Increasing farmers resilience

- **Monitoring systems and data collection and visualization enable:**
 - **Optimize** resource allocation
 - **Track** production output
 - **Enable** digital twins

Potential to other projects

- **Test and Validate Monitoring Technologies:** Panama's **diverse climate and challenging terrain** can serve as a **testing ground** for new monitoring technologies and data analysis techniques.
- **Develop Best Practices:** Share knowledge and experience in deploying and maintaining monitoring systems in **tropical environments**.
